

Hazard Communication and the Globally Harmonized System (GHS)

Cal/OSHA revised the Hazard Communication Standard ([HCS](#)) found in Title 8 of the California Code of Regulations ([T8CCR](#)), Section [5194](#) to align with the Globally Harmonized System ([GHS](#)) of classification and labeling of chemicals. The key changes in the Hazard Communication Standard affect both chemical suppliers (manufacturers, importers, distributors) and employers whose employees may be exposed to hazardous chemicals.

GHS is an international approach that standardizes chemical hazard classification, labeling and safety data sheets. For more information visit OSHA's GHS website at www.osha.gov/dsg/hazcom/ghs.html.

Effective Completion Date	Requirements	Responsibility
December 1, 2013	Train employees on the label elements and safety data sheet (SDS) format.	Employers
June 1, 2015 December 1, 2015	Compliance with all modified provisions of T8CCR 5194 including all GHS label requirements except: Until December 1, distributors may ship containers with non-GHS labels if received from suppliers prior to June 1, 2015.	Chemical manufacturers, importers, distributors and employers
June 1, 2016	Update any alternative workplace labeling used under section 5194(f)(6) , update the hazard communication program required by section 5194(h)(1) , and provide any additional employee training in accordance with section 5194(h)(3) for chemicals with newly identified physical or health hazards.	Employers
Transition period to the effective completion dates noted above	May comply with either section 5194 revised as of July 6, 2004, or the current version of this standard, or both during the transition period, per the above effective completion dates.	Chemical manufacturers, importers, distributors and employers

Required Product Label Elements

Suppliers must develop new product labels that include signal words, pictograms, hazard statements, and precautionary statements for chemicals based on their hazard classification and category. Employers must ensure that employees understand the meaning of each of these elements on the new labels.

SAMPLE LABEL

CODE Product Name _____ Company Name Street Address _____ City _____ State _____ Postal Code _____ Country _____ Emergency Phone Number _____	Product Identifier Supplier Identification	Hazard Pictograms Signal Word Danger
Keep container tightly closed. Store in a cool, well-ventilated place that is locked. Keep away from heat/sparks/open flame. No smoking. Only use non-sparking tools. Use explosion-proof electrical equipment. Take precautionary measures against static discharge. Ground and bond container and receiving equipment. Do not breathe vapors. Wear protective gloves. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Dispose of in accordance with local, regional, national, international regulations as specified. In Case of Fire: use dry chemical (BC) or Carbon Dioxide (CO ₂) fire extinguisher to extinguish. First Aid If exposed call Poison Center. If on skin (or hair): Take off immediately any contaminated clothing. Rinse skin with water.		Hazard Statements Highly flammable liquid and vapor. May cause liver and kidney damage.
Precautionary Statements		Supplemental Information Directions for Use _____ _____ _____ Fill weight: _____ Lot Number: _____ Gross weight: _____ Fill Date: _____ Expiration Date: _____

New Hazard Classification Requirements

The revision to the HCS requires suppliers to use the same classification criteria for each type of health and physical hazard as required by GHS. Detailed instructions for evaluation, classification, categorization of the hazards and use of label elements are provided in the mandatory Appendices A, B, C, D, and F of the standard ([T8CCR 5194](#)).

Safety Data Sheets Format

Safety data sheets (SDS) have replaced material safety datasheets (MSDS). Suppliers now must prepare safety data sheets for their products that follow a standardized 16-section format in conveying information about a hazardous chemical's health effects and physical and chemical characteristics.

Safety Data Sheet

1. Identification of the substance or mixture and of the supplier
2. Hazards identification
3. Composition/information on ingredients
4. First aid measures
5. Firefighting measures
6. Accidental release measures
7. Handling and storage
8. Exposure controls/personal protection.
9. Physical and chemical properties
10. Stability and reactivity
11. Toxicological information
12. Ecological information
13. Disposal considerations
14. Transport information
15. Regulatory information
16. Other information including information on preparation and revision of the SDS

program, which includes a list of hazardous chemicals known to be present, container labels, safety data sheets, and employee information and training. Safety data sheets must be immediately available to employees.

New Employee Training Requirements

New requirements include training on the meaning of the new label elements, the new safety data sheet format, and any newly identified physical or health hazards.

All employers must continue to provide information and training to their employees about the hazardous chemicals the employees may be exposed to in the workplace. The information and training must be provided at the time of their initial assignment and whenever a new chemical hazard is introduced.

Additional Information

- Additional Cal/OSHA standards were affected as a result of GHS adoption. For more information visit the Cal/OSHA Standards Boards website at www.dir.ca.gov/oshsb/oshsb.html
- Key resources and training materials are found at the Federal OSHA's Hazard Communication website at: www.osha.gov/dsg/hazcom/index.html

This document is not meant to be either a substitute for or a legal interpretation of the occupational safety and health regulations. Readers shall refer directly to Title 8 of the California Code of Regulations and the Labor Code for detailed information regarding the regulation's scope, specifications, and exceptions and for other requirements that may be applicable to their operations.

Written Hazard Communication Program

As before, it remains the employer's responsibility to develop and implement a written hazard communication (HAZCOM)
